Visegrad online database is a networking tool created to help organizations from Visegrad Region find reliable partners for international cooperation. Start-ups, SMEs, NGOs, development agencies, entrepreneurs, local authorities, special entitles and other institutions are invited to publish profiles and contact other users to start international cooperation. Each profile should be assigned to one category. Categories are based on the information found in Smart Specialization Strategies and related Polish, Czech, Slovak and Hungarian strategic frameworks. Inside the EU, Smart Specializations are linked to the use of the European Regional and Development Funds (ERDF). It enables users to position their targeted fields of cooperation in comparison to other organizations and to find potential partners for international projects and proposals.

LIFEBUTTON

Published date: January 29, 2015

Modified date: February 5, 2015

Location: Bratislava, Slovakia

LIFEBUTTON

We are developing a system for car safety.

Cause of death can be also by sudden health problem, not just consequence of an accident. Such as heart attack, hypoglycemia (diabetes), epileptic seizures, or other health problems.

There is currently no automotive system that could alert its surroundings of the driver's health problem.

The system have patent application and registered trademark.

We cooperate with institutions like, Red Cross, FIA, insurance companies, Slovak Technic University in Bratislava.

LIFEBUTTON was presented on several conferences and Startup competitions, with a positive responses.

Our goal is to implement the system into automotive primary production and allow additional installation for older vehicles.

For more information please contact us.

Targeted field of cooperation: Development partner. Idea partner in your country.
