Greetings from the PLACE in SPACE conference convenors

It is our pleasure to welcome you to the international scientific conference on “PLACE IN SPACE - SUBJECT OF REFLECTION AND AREA OF EDUCATIONAL ACTIVITIES”.

Through this meeting we want to celebrate the 80th birthday of Professor Wojciech Kojs and the 15th anniversary of the Department of Education at the WSB University.

The terms "space" and "place" have long played an important role in educational research and convey many experiences, meanings and connotations that relate to various fields of the humanities, social and natural sciences.

Changes that occur in contemporary social and material reality generate new problems that are challenges for pedagogical reflection and educational activities. Their implementation requires new PLACES or modification of existing PLACES in order to design optimal PLACES.

The scholars who will attend the conference show results on a wide range of social, cultural, political, economic, technologic, pedagogical, material and subjective issues concerning the production and organization of the public space of education and their differentiated readings, impacts and appropriations by education agents.

Counting on more than 60 scholars and 51 papers assigned to 9 sessions and 8 plenary addresses, we are firmly convinced that the PLACE IN SPACE conference and the WSB University will serve as the ideal venue to present ongoing research from different countries of the world, stimulating furthermore lively debate and exchange.

On behalf of the organizing committee,
