

The Professor's scientific fields of interests are Geoinformation technologies for high resolution spatial analysis of greenhouse gas emissions at the level of point-, line-, and area-type emission sources; methods and GIS technologies for spatial inventories of carbon dioxide, methane, nitrous oxide and other greenhouse gases at the national, regional and local levels, particularly in the sectors of energy, industry, transport, agriculture, forestry and land use change; uncertainty analysis in greenhouse gas inventories; gridded inventories and mapping greenhouse gas emissions; usage of remote sensing data for calibration of bottom-up inventories of greenhouse gases.

The Professor's research project contribution:

Austrian-Ukrainian project: "Retrospective analysis of Ukraine's and Austria's greenhouse gas emission inventories: Supporting decision-making for compliance with the Paris Climate Agreement" (2019-2010; scientific leader)

Austrian-Ukrainian project: "Spatio-temporal uncertainty assessment of GHG emission inventories with the specific focus on Austria and Ukraine: Learning in space and time and into the future" (2015-2016; project leader)

Ukrainian-Chinese project: "Spatial inventory of greenhouse gases in residential sector for Chinese and Ukrainian regions to support the effective economic and administrative decision making" (2013-2014; scientific leader)

Grant of EU 7FP "Geoinformation technologies, spatio-temporal approaches, and full carbon account for improving accuracy of GHG inventories" (Marie Curie Project n°247645 FP7-PEOPLE-2009-IRSES) (2010-2014; project co-leader)

Project of the Ministry of Education and Science of Ukraine: "GIS technologies for analysis of sinks and emissions of greenhouse gases in forestry sector for supporting decision-making" (2013-2014; project leader)

Project of the Ministry of Education and Science of Ukraine: "Geoinformation technologies to build regional cadastres of greenhouse gas emissions to support the effective economic and administrative decisions making" (2011-2012; project leader)

Ukrainian-Austrian project: „A cadastre for spatially resolved GHG emissions and their uncertainties" (2011-2012; project leader)

Ukrainian-Austrian project: "Towards a spatially referenced inventory of Kyoto GHG emissions and their uncertainties" (2009-2010; project leader)
